

Hi, I am Sandy Beach and I am a film producer!

I am wanting to create a new film that is set at the seaside but in the PAST and I need some help. I have no idea what seashores used to be like and was wondering if someone could help me? If you decide to take up the challenge why not create a poster for me but don't forget to label what you have drawn so I know what it is! To be extra helpful you could write a sentence underneath each feature and explain what has changed since then/why visiting a seaside now is different!

I would really appreciate your help as I have heard you already know lots about the differences between seashores in the past and now.

Thank you for reading,
SANDY
