

Read this paragraph carefully and traffic light the sentences.

Surprisingly, there are many animals in this layer. In the tree tops, you will find a variety of different birds, insects and mammals. As a result, it is a very exciting and vibrant place despite being so high and exposed. Trees grow up to approximately 200ft however this can vary. The first layer of the rainforest is called the emergent layer. This means the trees have to be extremely strong to survive the weather. Most of the trees' leaves are found in the emergent layer as they are able to catch plenty of sunlight. Unfortunately, it can be very windy and even stormy at times.

- Does it follow the traffic light structure?
- Are the sentences in the correct order?

Rewrite the paragraph into the correct order.
